Internet Reports:

https://eksplobalis.witpis.eu/?page_id=1111

Announcement No 2

Discussion panels

The conference program, in addition to speeches during plenary sessions, includes thematic workshops facilitating the exchange of views on innovative solutions in defense technologies in the aspect of military technology, as well as two discussion panels on:

- **Modern technologies in defense - challenges, innovations, implementation,**
- **Energy in military vehicles – sources, issues, future and innovations.**

The discussion on these topics will be an excellent opportunity to broaden knowledge and exchange experiences in the field of designing and developing modern armaments aimed at increasing security on the battlefield. In addition, experts will discuss innovative technological solutions in the field of equipment and control and diagnostic systems in the operation of military technology.

Conference fee

The conference fee should be paid to the account:
